

TYPE Cobalt-based welding electrode for overlay applications.

APPLICATIONS CEWELD® DUR 6U is a Stelitte 6 alloy with excellent properties against abrasion, thermal shock and

corrosion in conjunction with high temperatures. It produces a high-quality armoring on

components that are exposed to multiple stresses from erosion, corrosion, cavitation, pressure,

impact, abrasion and high temperatures up to 900 °C,

For example: sealing surfaces on fittings, valve seats and cones

for combustion engines, metal-to-metal sliding surfaces, highly stressed hot working tools without

thermal shock, grinding, stirring and drilling tools. drilling tools.

PROPERTIES CEWELD® DUR 6U has excellent welding properties and self-releasing slag. The weld metal can be

machined with carbide tools and by grinding. The hardness of the weld metal decreases by 16 % at

300 °C and by around 30 % at 600 °C. The weld metal is highly heat-resistant up to 900 °C.

Hardness of the pure weld metal: 40 - 42 HRC Hot hardness at 500 °C: approx. 30 HRC Hot hardness at 700 °C: approx. 160 HB

CLASSIFICATION AWS A 5.13: E CoCr-A

EN ISO 14700: E Co2

DIN 8555: E 20-UM-40- CTZ

F-nr 7'

SUITABLE FOR Steam-valves, High temperature liquid pumps, Hot cutting tools, Exhaust valves, Pumps, Plastic

recycling etc.
