

## **CEWELD DUR 12 Tig**

TYPE Cobalt-based thermo shock resistant alloy for overlay applications. (Stellite 12)

APPLICATIONS Steam-valves, high temperature liquid pumps, hot cutting tools, cutting tools for plastic, wood and

paper as well as high stressed sealings and sliding surfaces.

PROPERTIES Outstanding alloy against abrasion, thermo-shock and corrosion combined with high temperatures.

The weld deposit can be machined with tungsten tool tips and by grinding. The hardness of the weld deposit will degrees 20% at 600°C and has a nominal hardness of 49-53 HRc at room temperature. The weld deposit is high heat resistant up to 900°C. DUR 12 offers a low coefficient of friction of and exceptional resistance to galling. It has cavitation-erosion resistance ten times that of 304 stainless steel, DUR12 can be used to protect bearing surfaces in non-lubricating conditions due to its

resistance to metal-to-metal wear.

CLASSIFICATION AWS A 5.21: ERCoCr-B

EN ISO 14700: S Co3

F-nr 71

SUITABLE FOR Stellite 12 alloy for hardfacing steam-valves, high temperature liquid pumps, hot cutting tools,

cutting, tools for plastic, wood and paper as well as high stressed sealings and, sliding surfaces.
