

CEWELD Alloy C-2000 Certilas<sup>®</sup> THE FILLER METAL SPECIALIST Tig

TYPE	Nickel based wire rod for welding similar NiCrMo alloys									
APPLICATIONS	CEWELD Alloy C-2000 Tig (UNS N06200) is unique among the versatile nickel-chromium- molybdenum materials in having a deliberate copper addition									
PROPERTIES	Like other nickel alloys, it is ductile, easy to form and weld, and possesses exceptional resistance to stress corrosion cracking in chloride-bearing solutions (a form of degradation to which the austenitic stainless steels are prone). It is able to withstand a wide range of oxidizing and non-oxidizing chemicals, and exhibits outstanding resistance to pitting and crevice attack in the presence of chlorides and other halides.
