

TYPE Fluxcored welding wire for corrosion resistant hardfacing applications

APPLICATIONS Rebuilding parts that faces wear combined with corrosion and impact.

PROPERTIES Extreme tough and corrosion resistant weld deposit, well suited for parts that encounter wear from

sea water plant and power plant operation. This acid corrosion resistance alloy has a 14% Cr.

content combined with 0,3% carbon that results in excellent wear properties.

CLASSIFICATION EN ISO 14700: T Fe8

SUITABLE FOR Bridge bearings, sealing surfaces, corrosion slide ring sealing, roller bearings, centrifuges, valves,

pumps, shafts etc.
