

CEWELD SACW 2594 Super Duplex

TYPE High-alloyed tubular wire based on Super Duplex low carbon deposit for the Sub-Arc process

APPLICATIONS Welding forget or cast Super Duplex stainless steels for service in the as welded condition. For use

where a high strength and good corrosion resistance is important in oil and gas production and processing system: pumps, valves, piping systems, risers etc.. SACW Super Duplex can also be used

as an alternative for root welds to standard duplex to offer improved pitting resistance.

PROPRIÉTÉS Higher productivity, higher deposition rates and improved wetting properties compared to solid

wires with excellent X ray soundness. Improved hot cracking resistance and mechanical properties.

To be used with welding flux FL 8111 or FL 838

CLASSIFICATION AWS A 5.9: ER2594
