

# CEWELD Alloy 825 Tig

**TYPE** Solid Nickel based welding wire for gas tungsten arc welding

**TOEPASSINGEN** The excellent corrosion-resistant properties of CEWELD Alloy 825 make the alloy a suitable choice for a variety of difficult applications. Uses include fabricated equipment found in chemical and petro- chemical processing, pulp and paper manufacturing, flue gas desulphurization systems and metal pickling operations.

**EIGENSCHAPPEN** Excellent weldability with fully austenitic weld metal with high resistance against stress corrosion cracking and pitting in media containing chloride ions. Good corrosion resistance against reducing acids due to the combination of Ni, Mo and Cu. Sufficient resistance against oxidizing acids. The weld metal is corrosion resistant in sea water.

**CLASSIFICATIE**

AWS	A 5.14: ERNiFeCr-1
