

# CEWELD Alloy 740H Tig

**TYPE** Solid Nickel based welding wire for gas tungsten arc welding

**TOEPASSINGEN** A Superalloy Specifically Designed For Advanced Ultra Supercritical Power Generation. Potential applications include advanced power production boiler tubes and diesel engine exhaust valves.

**EIGENSCHAPPEN** Alloy 740H Tig is a nickel-base, precipitation hardenable superalloy that offers a unique combination of high strength and creep resistance at elevated temperatures along with resistance to coal ash corrosion. The alloy was originally targeted for use as A-USC boiler tubes in the superheater sections of these plants but was then adapted for application as a material for the steam headers to which the boiler tubes are connected.

**CLASSIFICATIE**

AWS	A 5.14: ~ ER NiCrCo-1
F-nr	43
FM	6

**GESCHIKT VOOR** Inconel alloy 740H

**GOEDKEURINGEN**

**LASPOSITIES**

**TYPICAL CHEMICAL ANALYSIS OF THE FILLER METAL (%)**

C	Si	Mn	Cr	Ni	Mo	Nb	Fe	Co
