

# CEWELD 430 LNb

TYPE	Stabilized stainless steel welding wire for ferritic steels														
TOEPASSINGEN	430 LNb is developed and designed for the Automotive industry and used for production of exhaust systems and catalytic converters.. The wire should be used when there is a need for good resistance to corrosion and thermal fatigue.														
EIGENSCHAPPEN	Good corrosion and temperature resistance and excellent weldability. Due to the risk of grain growth in the melted zone, welding wire with a diameter larger than 1,2 mm is to be avoided
